

## Americans in support of Civil Rights

I represent American citizens that are in favor of protecting our civil rights that are guaranteed in The United States Constitution. We want to provide justice for all individuals regardless of race, gender, or religious affiliation. Protection of the Civil Rights is our primary goal.

The government is required to protect our civil rights, so why are so many people fighting the government for their rights? This should not be happening. Our civil rights are guaranteed to us and there are reasons why our country has them. When everyone is treated equally you can have the smartest people working together for a common goal. All Americans deserve fair chances in education, employment and the chance to go as far as their talent and hard work will take them.

Innocent people are going to jail everyday for crimes they didn't commit. It takes a very long time for these people to go to court and many times they don't have the money for a decent lawyer to represent them.

What part is fair trial is that?

Gun control? The second amendment guarantees us the right to own a gun. It is an important part of our tradition and it is a way of protecting our families and ourselves. There is a reason why that is in the Constitution. It has always been important for Americans to protect themselves. Revoking their ability to own a gun should punish people that have committed gun crimes, but only after they have been convicted.

Our founding fathers had a reason for our civil rights and we believe those rights need to be protected. The less a government controls the better off society will be. If we let the government take a little bit of our civil rights they will never want to stop and they will continue to take our rights until we stop them.

I will support any bill that protects our civil rights.
