Artist Rights Movement

I represent a movement that helps protect art forms of any kind from being censored. Musicians and artist alike have a right to be able to display and/or play their creations in a way that the piece was originally written and/or recorded. It is these peoples Civil Rights that we infringe upon by force our own moral objective of what is decent and what is not, they are merrily expressing what or how they feel in a way that some find unacceptable.

But what is decent to one may not be decent to all so why should one own personal preference prevail over an art. Why not hold the parents of these children accountable for what they see hear and/or read after all is it not our parents that teach us right and wrong. They should be the ones held accountable for these children's actions not the music industry or the books these children read. I understand that as some may read this they see an opportunity for many to say that the revolting things seen, heard, or read are protected by these laws that I will be supporting but that is why the parents are armed with many choices such as fluttering software televisions and computers or just putting a foot down on a CD or book deemed to mature for a child. After all children do learn at different paces then others do.

By passing any laws to help this cause we will be protecting not only these people s right but our own rights as well for you see if they take a little eventually they will want quite a bite more until we have nothing left to give and all is taken from us.

My beliefs this will offer more people an opportunity at self expression that they feel would other wise be changed into something that it was not meant to be, that would be changed molded or diluted from its original state.

I support any and all legislation that would protect the arts in America from censorship.
