## The Right To Life

I represent the citizens in Montana that believe that abortion is a violation on the rights of a baby. Abortion should not be a choice of the mother, because that is not the life that hangs in the balance.

Abortion is a violation on the rights of an unborn baby. Babies should have the most basic rights, including the right to life. There are many alternatives a mother can take besides killing her own baby. Adoption is a solution that should be mandatory if the mother does not want to keep the baby. This unborn child should have the right to live and no one should be able to take it away.

Killing is not legal in the United States. Abortion should not be an exception. There is a life growing within the mother, and just because it can't function on its own does not mean that it should not have any rights. The baby has the right to live and the mother does not have the choice to harm the separate being inside of her.

Of course there are some exceptions to this rule. If there is no chance the baby will live then the mother should not have to go through the pregnancy and birth. Also whenever the mother's life is in danger then she should have the choice for an abortion. Otherwise the baby has the right to live, and the mother does not have the choice to kill the baby.
